

# Mattermost

This publisher allows Continua CI to send notifications to users or channels on the [Mattermost](#) messaging platform.

## Mattermost

**New Notification Publisher**

Publisher

Mattermost

Options

Required Field

Server URL

https://mattermostserver:8065

The base URL of the Mattermost service.

Personal Access Token

9xuqwrwgstrb3mzrb83nb357a

A personal access token associated with a Mattermost account or bot.  
See [Personal Access Tokens](#).

Subscription Types

☒ Users and groups ☒ Channels

Team Name

Specify the name of a team containing channels that this publisher can send messages to.

Default Channel

Specify the default channel for this publisher e.g. town-square, or a member id to direct all messages to a Mattermost user e.g. @matt\_most.  
This can be overridden when creating a subscription.

Help

### Server URL

The base URL of the Mattermost service. "/api/v4" will be appended to this URL when calling REST endpoints to send messages.

### Personal Access Token

This personal access token associated with a user account or a bot to use as the notification sender. This must have "create\_post" and "read\_channel" permissions. To send notifications direct to users, it must also have the "create\_direct\_channel" (or "manage\_system") permission.

### Enabled Subscription Types

Subscriptions can be set up to send notifications to a specific user, a group of users or a Mattermost channel. Tick the subscription types that are allowed for this publisher.

### Team Name

The name of the team containing channels this publisher can send the messages to.

### Default Channel

The default channel for this publisher to send the message to. Enter a channel name, e.g town-square, or a username (prefixed with @) to direct all messages to a Mattermost user. This can be overridden when creating a subscription.

## Options

**New Notification Publisher**

Publisher

Mattermost

Options

Required Field

☒ **Include attachments**  
Specify whether messages should include attachments using the attachments message template.

Advanced

Maximum Requests per Second

0

Adjust this as necessary to match your Mattermost rate limiting settings. Leave as zero to automatically set the rate limit based on the response headers.

Help

### Include attachments

Tick this to use the Attachments template format rather than the Markup template format when sending the message.

### Maximum Requests per Second

Adjust this, as necessary, to match your Mattermost rate limiting settings. Leave as zero to automatically set the rate limit based on the response headers.
