

# Publishers

This page describes the features available from version 1.9 - see [Publishers \(pre-1.9\)](#) for older versions

Publishers define how notifications are sent to users. Continua CI includes a set of publisher types: [Email](#), [HipChat](#), [Mattermost](#), [Slack](#), [Stride](#), [XMPP](#) and [private message](#).

Administrators can configure publisher settings on the Publishers page in the Administration area.

**Metrics**

Name	Type	Message Queue	Retry Queue	Errors per Min.	Avg. Queue Time	Avg. Send Time	Sent per Sec.	Sent per Min.	Paused For	Enabled
Default-Email	Email	0	0	0	0 ms	0 ms	0	0	0 ms	<input checked="" type="checkbox"/> [Edit]
Default-XMPP	XMPP	0	0	0	0 ms	0 ms	0	0	0 ms	<input checked="" type="checkbox"/> [Edit]

This shows a list of the publishers that you have configured. Metrics are shown next to each publisher giving statistical details on the throughput of its messages.

Default publishers are already added for Email and XMPP. You can edit these using the 'Edit' button and/or add new publishers of these or other types using the 'Create' button.

### New Notification Publisher

**Publisher**

Required Field

**Publisher Name**
