

# PropertySet Increment Value Action

The PropertySet increment value action allows you to increment or de-increment an integer property of a property set.

## Increment Property

The screenshot shows a dialog box titled "PropertySet increment value" with three tabs: "General", "Runtime", and "Increment Property". The "Increment Property" tab is active. It contains two main sections: "Property Set" and "Increment settings".

- Property Set:** A dropdown menu is set to "VersionInfo".
- Increment settings:**
  - Increment:** A numeric spinner box is set to "1".
  - Property to increment:** A dropdown menu is set to "BuildVersion".

At the bottom of the dialog are three buttons: "OK", "Cancel", and "Help".

### Property set

Select the property set which contains the property you wish to increment.

### Increment settings

#### Increment

Select a positive or negative value which will be added to the integer property.

#### Property to increment

Select the property to increment. If the property is not an integer type the action will fail
