

Import NUnit Tests Action

Import NUnit Tests

Import NUnit Tests Action

Import NUnit Tests | Comments

Name Required Field

Enabled

XML Files 

The path or paths of NUnit output XML files to import.

Fail action if any tests fail

Fail action if any tests error

Ignore warnings

Name

A friendly name for this action (will be displayed in the [actions workflow area](#)).

Enabled

Determines if this action will be run within the relevant stage.

XML Files

A list of NUnit test output XML files to import. Each file/pattern must be entered on a new line. You can specify an exact file with its path or you can use pattern matching.

You can exclude files by prefixing the file name or pattern with a dash. e.g. `-*.ignore`. Exclude patterns always take precedence over include patterns

More information about pattern wild cards can be found on the [Ant Pattern Usage](#) page.

Fail action if any tests fail

Tick this to cause the build to fail if any tests fail.

Fail action if any tests error

Tick this to cause the build to fail if an error occurred while running any test.

Ignore warnings

If this is ticked, any warnings logged will not mark the action with a warning status.
