

Wait Until Action

The Wait Until action enables you to wait for a specific amount of time before continuing the project run.

Wait Until

Wait Until

General Runtime **Wait Until**

Time to wait for

☒ Specific time

5:00 PM

☐ Time from variable

Wait for day

☐ Any day

☐ Same day that action is run (ie "today")

☐ Day after action is run (ie "tomorrow")

☒ Day of the week: Friday

☐ Specific date: ☒ Specific date ☐ Date from variable

12/02/2015

Options

☐ Fail if this date and time has already passed

☐ Count relative to the day the build started

Running action updates remaining time every 1 second.

OK Cancel Help

Time to Wait For

Specific Time

Specify the time you wish to wait for by typing it into the field, or click the drop down button to see an analog clock face that you can (optionally) use to set the time. Use the left and right mouse buttons to set the hour and minute hands, respectively, then click the "Set" button to set the new time.

Time from variable

Wait For Day

Any day

The action will go off at the next occurrence of the given time (ie today or tomorrow.) If you set the time to be 5pm and the action starts at 3pm, then it will wait for two hours. If the action starts at 6pm, it will wait 23 hours until 5pm the next day.

Same day that action is run

The action will run the same day that it is started. If you set the time to be 5pm and the action starts at 3pm, it will wait for two hours. If the action starts at 6pm, it will run immediately.

Day after action is run

The action will run at the specified time, the day after the action is run.

Day of the week

The action will wait for the specified day of the week.

Specific date

The action will wait for a specific date before running.

Options

Fail if this date and time has already passed

If the date/time combination has already passed when the action is run, it will normally continue immediately.

Check this option to have the action fail outright if the date and time have already passed.

Count relative to the day the build started

Running action updates remaining time every X second

While the action is running, the Current Running Actions section of the [Run Tab](#) is updated with a progress bar and the amount of time left until execute resumes. Use this option to determine how often that information is updated.

To disable updates entirely, set the update interval to zero seconds.
