

# Windows Installer - Install Action

The Windows Installer - Install action enables a windows installer package to be installed on a local or remote computer.

## Options

The screenshot shows the 'Windows Installer - Install' dialog box with the 'Options' tab selected. The dialog has a title bar with a close button (X). Below the title bar are four tabs: 'General', 'Runtime', 'Options' (highlighted), and 'WMI Connection'. The 'Options' tab contains a 'Package options' section with a document icon. It includes a 'Package location' text field with a folder icon on the right. Below this is a 'Properties' section with a large empty text area. At the bottom of the 'Properties' section are two text fields labeled 'Property name' and 'Property value', followed by a green checkmark button and a red X button. At the very bottom of the dialog are three buttons: 'OK', 'Cancel', and 'Help'.

### Package options

#### Package Location

The location of the package to be installed. The package must be accessible by the computer on which it is being installed.

#### Properties

The properties to be passed into the installer.
