

# Choose One Action

The Choose One action allows you to prompt the user to make a single choice given one or more options. The choices are presented as Radio Buttons. For more information on variables, including creating your own project and user variables, see [here](#).

 By default, interactive actions are not available from the [Async Action Groups](#).

## Details

Choice Text	Choice Value
Mobile Application	Mobile
Desktop Application	Desktop

### Dialog Caption

The text to display above the choices

### Choices

Add one or more choices with their corresponding value. The variable will be set to the value of the chosen choice.

### Set Variable

Select the variable to set to the chosen choice value.

When the action runs, the user will be prompted by the following dialog:

The first option is always chosen as default. Pressing OK will set the variable, whereas Cancel will fail the action.
