

# SFTP Disconnect Action

Simply specify the SFTP connection in the SFTP Disconnect action property page and when this action runs it will perform a disconnect from the SFTP server.

The image shows a software configuration window titled "SFTP Disconnect". It has a dark theme and a tabbed interface with three tabs: "General", "Runtime", and "Disconnect". The "Disconnect" tab is currently selected and highlighted in blue. Below the tabs, there is a section labeled "SFTP connection" with a small icon of a server. Under this label, there is a dropdown menu that currently displays "SFTPConnection". At the bottom of the window, there are three buttons: "OK", "Cancel", and "Help".
