Application Options

Application

The screenshot shows the 'Create Application (IIS 7)' dialog box with the 'Application Options' tab selected. The dialog has a title bar with a close button (X) and a tab bar with 'General', 'Runtime', 'Server', 'Website Options', and 'Application Options'. The 'Application Options' tab contains three fields: 'Application path' with the value '/Wiki', 'Physical path' with the value 'C:\LocalData\Wiki\' and a folder icon button, and 'Application pool' with a dropdown menu showing 'WikiAppPool'. At the bottom are 'OK', 'Cancel', and 'Help' buttons.

Field	Value
Application path	/Wiki
Physical path	C:\LocalData\Wiki\
Application pool	WikiAppPool

Application Path

The path of the new application.

Physical Path

An optional value that specifies the physical path for the application's root virtual directory.

Application Pool

The application pool which the new application will use, the default is the 'DefaultAppPool'.
