

NuGet Push Action

The Push action pushes a package to either the default or specified feed.

The image shows a 'NuGet Push' dialog box with a dark theme. It has three tabs: 'General', 'Runtime', and 'NuGet Push', with the last one being active. Under 'NuGet push options', there is a 'Package' field containing the text '%OutputDir%\CompanyFork_RestAPI.nupkg' and a folder icon button. Under 'Optional parameters', there is a 'Target' field containing '||InternalNuget\Repo\'. Below this is a checkbox labeled 'Create only (upload, but do not publish)' which is currently unchecked. At the bottom right are 'OK', 'Cancel', and 'Help' buttons.
