

PDF Insert Text Action

[FinalBuilder Professional Edition]

The PDF Insert Text action will add HTML formatted text to a PDF file at the specified X, Y location.

Insert Text Options

The screenshot shows the 'PDF Insert Text' dialog box with the 'Insert Text Options' tab selected. The 'Source file' and 'Output PDF file' fields both point to 'C:\Projects\RestAPI\Help\AllCommands.pdf'. The 'Edit Source File' checkbox is unchecked. The 'Insert text' section has 'X location' set to 100, 'Y location' set to 20, and 'Page range' set to 1-1. A note states: 'NOTE: Co-ordinates are measured from the top left hand corner'. The 'HTML formatted text' area contains the text: 'Copyright 2010 SomethingSpecial.io Pty. Ltd. '. At the bottom are 'OK', 'Cancel', and 'Help' buttons.

X location	Y location	Page range
100	20	1-1

HTML formatted text

```
<b>Copyright 2010 SomethingSpecial.io Pty. Ltd. </b>
```

Source file

Specify the source PDF file

Output PDF File

Specify the new PDF file if not editing the source file

Edit Source File

All changes made will be written back to the source file

Insert text

X, Y Location

Specify the location to insert the text. The location is the x, y co-ordinates measured from the top left hand corner of the page. The X, Y values must be a valid integer or floating point number.

Page Range

Specify the page range to write the text to. The format is <page number> or <page start>-<page end>. If left blank, page 1 will be assumed. To specify all pages after the specified page, leave the <page end> blank, eg. 1- specifies all pages. Some examples are: "3" - just write to page 3. "2-45" - write to pages 2 to 45 inclusive. "5-" - write to all pages from 5 until the end of the document.

HTML Formatted Text

Specify the text to write out formatted using HTML. The HTML tags supported are:

Bold....

Italic<i>....</i>

Underlined<u>....</u>
