

PropertySet Increment Value Action

The PropertySet increment value action allows you to increment or de-increment an integer property of a property set.

Increment Property

The screenshot shows a dialog box titled "PropertySet increment value" with a close button (X) in the top right corner. The dialog has three tabs: "General", "Runtime", and "Increment Property", with the "Increment Property" tab currently selected. The "Property Set" section contains a dropdown menu with "VersionInfo" selected. The "Increment settings" section contains an "Increment" spinner box set to "1" and a "Property to increment" dropdown menu with "BuildVersion" selected. At the bottom of the dialog are three buttons: "OK", "Cancel", and "Help".

Property set

Select the property set which contains the property you wish to increment.

Increment settings

Increment

Select a positive or negative value which will be added to the integer property.

Property to increment

Select the property to increment. If the property is not an integer type the action will fail
