

NDepend Action

NDepend allows you to automate the analysis of a NDepend Visual project file.

NDepend Project File

NDepend

General Runtime **NDepend Create Report**

NDepend project file

Select the NDepend Project file (.xml) to be analysed.

Input directories (Optional)

Add

Output directory (Optional)

Custom XSL file (Optional)

Options

☐ View report ☐ Emit visual NDepend bin XML

☐ Silent

OK Cancel Help

NDepend Project File

Specify the path of the NDepend Visual Project file (.xml) to be analysed. This field is a required value.

Input Directories

Override the Input directories specified in the NDepend Visual Project file. The directories in the Project file will be ignored if you specify your own input directories.

Output Directory

Override the default output directory (which is the NDepend Visual project directory).

Custom XSL File

Specify a custom XSL file to allow custom formatting of the output report.

Options

View Report

Display the HTML report once the action is run.

Silent

Suppress log output from NDepend console.

Emit Visual NDepend Bin Xml

Include the VisualNDepend.bin.xml file in the output files.

All paths must be specified as an absolute reference, relative paths will not work.
