

String Trimming Action

The String Trimming Action allows you to remove white space from the beginning or end of a string.

Input And Output

The screenshot shows the 'String Trimming' dialog box with the 'Input and Output' tab selected. The dialog has a title bar with a close button (X) and a tab bar with four tabs: 'General', 'Runtime', 'Input and Output' (active), and 'Trim Options'. The 'Input' section has a label with a percentage icon and a text field. Below it are two radio buttons: 'From variable' (selected) and 'Specify value'. The 'From variable' option has a dropdown menu showing '_File'. The 'Specify value' option has an empty text field. The 'Output' section also has a label with a percentage icon and a text field. Below it are two radio buttons: 'Apply to existing value' (selected) and 'Specify output variable'. The 'Specify output variable' option has a dropdown menu. At the bottom are three buttons: 'OK', 'Cancel', and 'Help'.

Input

From variable

Select existing variable to be used.
