

Accurev Add Action

AccuRev Add action enables you to convert one or more existing files and/or directories in a workspace to version controlled elements.

The screenshot shows the 'AccuRev Add' dialog box with the 'Add Options' tab selected. The dialog has a title bar with a close button (X) and a tab bar with 'General', 'Runtime', 'Add Options', and 'Server Options'. The 'Add Options' tab contains the following fields and controls:

- Add options**: A section header with a document icon and a checkmark.
- Workspace (Leave blank to use default workspace)**: A text input field with a folder icon on the right.
- File or folder (new line per file)**: A large text area for listing files or folders.
- Browse**: A button with a folder icon to open a file explorer.
- Recursive**: A checkbox.
- Include all files in folder**: A checkbox.
- Comment**: A text input field.
- Buttons**: 'OK', 'Cancel', and 'Help' buttons at the bottom right.

Workspace

The local path to the workspace.

File or Folder

The path to the file or folder which you are adding. This file must reside in your workspace.

Recursive

Recurse into specified directory and add all external files in that directory.

Include all files in folder

Selects all external files and directories in the workspace.

Comment

The comment to be associated with the transaction.
