

# Accurev Promote Action

The AccuRev Promote action enables you to send a stream's changes to its parent stream.

The screenshot shows the 'AccuRev Promote' dialog box with the 'Promote Options' tab selected. The dialog has a title bar with a close button (X) and a tab bar with 'General', 'Runtime', 'Promote Options', and 'Server Options'. The 'Promote Options' tab contains the following fields and options:

- Promote options** (icon of a document with checkmarks)
- Workspace** (Leave blank to use default workspace): A text field with a folder icon on the right.
- Comment**: A text field.
- Source stream**: A text field.
- Destination stream** (Leave blank to promote to parent stream): A text field.
- Files**: A text field with a folder icon on the right.
- ☐ Promote all elements
- ☐ Promote all kept elements
- ☐ Promote all pending elements
- ☐ Ignore "change package merge required" error
- ☐ Keep modified elements then promote
- ☐ Override
- Buttons**: OK, Cancel, and Help.

## Workspace

The local path to the workspace.

## Comment

The comment to be associated with the transaction.

## Source Stream

The stream to promote.

## Destination Stream

The stream to promote the change to.

## Files

The elements to promote to the destination stream.

## Keep modified Elements then Promote

If an elements status is set to modified, then the element will be kept first, then promoted.

## Override

Changes the behaviour of AccuRev when dealing with name discrepancies, and forces the promotion even if a merge would normally be required.
