

Microsoft Hyper V

The Hyper V actions allow you to control virtual machines that are hosted on a Microsoft Hyper V Server.

Hyper V Actions

The following actions are available:

Hyper V Options Page

The Hyper V Options page allows you to specify default values for the Hyper V Server name and Credentials. These details are not required but can save time when creating a build that uses multiple Hyper V actions which all use the same Hyper V Server.

For more information about Hyper V Server options see the [Hyper V Server page](#).
