VMWare Server

VMWare Server has a powerful COM interface which can be used to administer Virtual Machines. The VMWare Server actions allow you to use this interface.

> ⚠️ You will need the VMWare Server COM Client API installed on your computer in order to use the VMWare Server actions. The COM Client API installed as part of a standard VMWare Server installation.

Server Property Page

Server Address

If connecting to a remote instance of VMWare Server, enter the server name (and, optionally, a custom port) in this section.

You will still need the COM Client API (although not necessarily a full VMWare Server installation) installed on the local machine.

Authentication

If you wish to VMWare Server using non-standard credentials, enter them here.

If left blank, the connection will use the credentials of the currently logged in user (recommended.)
