

## Step 3 - Common Settings

Set common output and input directories you would like the projects to share.

The screenshot shows the 'Borland Developer Studio Project Import Wizard' window. The title bar reads 'BDS Project Import Wizard'. The main title is 'Borland Developer Studio Project Import Wizard' and the subtitle is 'Common Settings'. On the left, a dark sidebar contains the text 'Back to Select Project File', 'Step 3 of 7 Common Settings', and 'Next Step Common Information'. The main area has two sections. The first section, 'Enable Common Output Directories', has a checkbox that is currently unchecked. Below it are four text boxes with folder icons: 'Output Directory', 'Unit Output', 'Package Output', and 'DCP Output'. The second section, 'Enable Common Input Directories', also has an unchecked checkbox. Below it are two text boxes with folder icons: 'Search Path' and 'Library Path'. At the bottom right are three buttons: '< Back', 'Next >', and 'Cancel'.

### Enable Common Output Directories

Select this option to set all the generated Compile Delphi Win32 Project Actions with the same output directory settings.

**Output Directory**

**Unit Output**

**Package Output**

**DCP Output**

### Enable Common Input Directories

Select this option to set all generated Compile Delphi Win32 Project Actions with the same input directory settings.

**Search Path**

**Library Path**
