# **Generate Key Pair [SN] Action**

Generates a new 512-bit key pair and writes it to the specified file. For generating 1024-bit keys make sure that Microsoft enhanced cryptographic provider is installed

## **Run SN.EXE**

## **Output File**

The file to write both the public and private keys into.

# **Framework Version**

### Use default framework version (vX.X) / Use vX.X

Allows the selection of the .NET version to use for the tool. The minimum is .NET v2.0.

#### Use 64-bit tools

This options specifies as whether to force the usage of 64-bit tools on a 64-bit system or not. As FinalBuilder is currently a 32-bit application it will default to running the 32-bit version on a 64-bit system. Check this option if you require the 64-bit version to be run.
