

_Inc_7zip_Settings

Settings

The screenshot shows the '7-Zip Create Archive' dialog box with the 'Settings' tab selected. The dialog has a dark theme and a tabbed interface. The 'Files & directories' section contains three text fields: 'Archive name' (C:\Projects\Output\Zips\Source.7z), 'Root directory' (C:\Projects\ToZip\), and 'Working directory (for temporary files)' (C:\Temp\). The 'Options' section has a 'Recurse' dropdown set to 'Use Default' and a 'Password' field. The 'If archive exists' section has three radio buttons: 'Fail', 'Overwrite', and 'Update' (selected). The '7 ZIP' logo is in the top right corner. At the bottom are 'OK', 'Cancel', and 'Help' buttons.

Files & Directories

Archive Name

Specify the name of the new archive. The file extension should match the type of archive you are creating (eg. ZIP)

Root Directory

You can optionally set this to a directory so that the included files can be relative to this directory

Working Directory

Any temporary files will be placed in this directory

Options

Recurse

Specify how it should deal with sub-folders

Password

Specify a password to protect the archive. You'll need to supply this password to decrypt the archive
