

# If Prev Action Failed Action

This action will execute it's child actions only if the previous sibling action failed. For this to happen the previous sibling action needs Ignore Failure enabled:

Description	Enabled	Ignore Failure	S
 An action which might fail	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
  If Prev Action Failed	<input checked="" type="checkbox"/>		
 The action failed, so handle it	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

You can also use execute a set of actions if the previous action succeeds
