Application Variables

Application Variables are defined by FinalBuilder at start-up. The actual variables available will depend on which software you have installed on your machine. Application Variables cannot be modified.

These Application Variables are available on all machines :

SYSDIR	The Windows System Directory, eg. 'D:\WINNT\System32'
WINDIR	The Windows Directory - eg. 'D:\WINNT'
COMPUTERNAME	The name of the computer you are running FinalBuilder on.
USERNAME	The Name of the currently logged on User
DOSCMD	The path to the DOS command interpreter. This is used internally by FinalBuilder.

The following Application Variables are created by FinalBuilder:

ISAUTOBUILD	True if the build is being run automatically from a command line parameter.
ISCONSOLEBUILD	True if the build is being run from the console under FBCMD.EXE.
ISINTERACTIVEBUI LD	True if the build is being run under the FinalBuilder IDE.
ISINCLUDEDPROJE CT	True if the current project is being run as a child project
	(via the Include FinalBuilder Project Action)
FBPROJECT	The full path to the currently running FinalBuilder project file.
FBPROJECTDIR	The dir where the currently running FinalBuilder project lives.
FBDIR	The directory in which FinalBuilder is installed.
FBIGNOREDERRO RS	The number of actions in error during the build that were ignored.
FBBUILDTYPE	When running in the IDE, is this a full run or a run started part-way through? Possible values are script constants btFull, btFromCurrent, btSelected or btSelectedAndChilren.
ISSERVERBUILD	True if the project is being run by FinalBuilder Server.
FBSERVERPROJE CTNAME	If the project is run by FinalBuilder Server, holds the name of the project as it is defined there

These Variables may appear on your system, depending on whether you have the software installed :

VB6	The path to the Visual Basic 6 compiler
DELPHI3DIR	The directory where Delphi 3 is installed
DELPHI3	The path to the Delphi 3 command line compiler
DELPHI3_BRCC32	The path to the Delphi 3 Resource compiler
DELPHI4DIR	The directory where Delphi 4 is installed
DELPHI4	The path to the Delphi 4 command line compiler
DELPHI4_BRCC32	The path to the Delphi 4 Resource compiler
DELPHI5DIR	The directory where Delphi 5 is installed
