

PropertySet Increment Value Action

The PropertySet increment value action allows you to increment or de-increment an integer property of a property set.

Increment Property

The screenshot shows a dialog box titled "PropertySet increment value" with a close button (X) in the top right corner. It has three tabs: "General", "Runtime", and "Increment Property", with the latter being the active tab. The dialog is divided into two main sections. The first section, "Property Set", includes a folder icon and a dropdown menu currently showing "VersionInfo". The second section, "Increment settings", includes a calculator icon and two controls: an "Increment" spinner box set to "1" and a "Property to increment" dropdown menu set to "BuildVersion". At the bottom of the dialog are three buttons: "OK", "Cancel", and "Help".

Property set

Select the property set which contains the property you wish to increment.

Increment settings

Increment

Select a positive or negative value which will be added to the integer property.

Property to increment

Select the property to increment. If the property is not an integer type the action will fail
