Concatenate Files Action

This action concatenates two text files into a single new file, or merges/appends a file into the destination file.

Concat Files

Files

Source file 1

The first source file for the concatenation of files.

Source file 2

The second source file for the concatenation of files.

Destination file

The name of the file that should result from the concatenation of the files.

If destination file exists

Fail if exists

Specify this option if the action should fail due to the destination file existing already.

Append to if exists

Specify this option if the action should append to the destination file if it already exists. The is helpful for appending to a large log file, or an accumulative report for a number of builds.

Overwrite if exists

Specify this option if the action should simply overwrite the destination file if it already exists.

> ⚠️ Source Files 1 & 2 cannot be the same file, and they cannot be the same as the destination file. Source 2 may be blank if appending to an existing file.
