

Delete Files Action

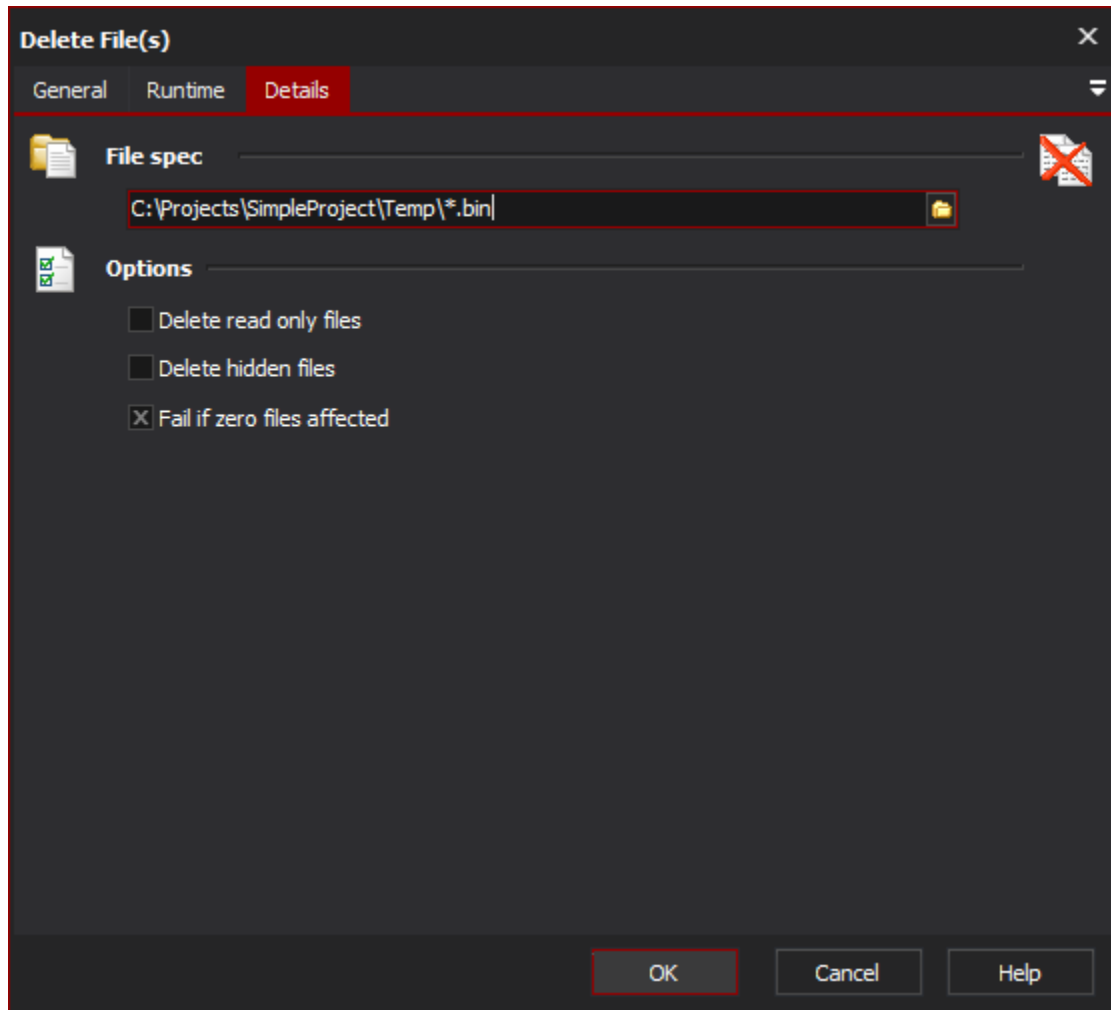

The Delete files action deletes one or more files.

On this page:

This action does not provide an option to recurse through directories. For this you need the [Delete Directory Action](#).

Details

A screenshot of the 'Delete File(s)' dialog box. The dialog has a title bar 'Delete File(s)' with a close button. Below the title bar are three tabs: 'General', 'Runtime', and 'Details', with 'Details' being the active tab. The 'File spec' section has a folder icon and a text field containing 'C:\Projects\SimpleProject\Temp*.bin', followed by a folder selection icon. To the right of the text field is a red 'X' icon over a document. The 'Options' section has a document icon with a checkmark and three checkboxes: 'Delete read only files' (unchecked), 'Delete hidden files' (unchecked), and 'Fail if zero files affected' (checked). At the bottom are three buttons: 'OK', 'Cancel', and 'Help'.

FileSpec

Specify the file(s) to delete. You can use wildcards (? or *) in the file name.

Options

Delete Read Only Files

Normally read only files will not be deleted. Check this option to remove them.

Delete Hidden Files

Similar to Delete Read Only files.

Fail If Zero Files Affected

If this option is checked and no files are found, the action will fail.
