

Windows Installer - Uninstall Action

The Windows Installer - Uninstall action allows a application installed by a windows installer package to be uninstalled.

Options

The screenshot shows the 'Windows Installer - Uninstall' dialog box with the 'Options' tab selected. The dialog has a title bar with a close button (X) and a tab bar with 'General', 'Runtime', 'Options', and 'WMI Connection'. The 'Options' tab is active, showing 'Uninstall options' with a document icon. There are two radio button options: 'MSI setup file' (selected) and 'Application name'. The 'MSI setup file' option has a text input field with a file explorer icon on the right. The 'Application name' option has a text input field. At the bottom are 'OK', 'Cancel', and 'Help' buttons.

Uninstall options

MSI Setup File

The setup file used to install the application. The setup file does not need to be accessible by the computer which the application is being uninstalled on, as it is only used to get the products identification number.

Application Name

The name of the application to uninstall. If more then one application is found with the same name, only one of the applications will be uninstalled.
