Delete Application Pool Action - [IIS 6]

The IIS Delete Application Pool action enables you to remove existing application pools from an IIS server.

Server

IIS server

Use global server settings from IIS options

Server

Authentication

Use global credentials from IIS options

Use these credentials

Username

Password

Pool Properties
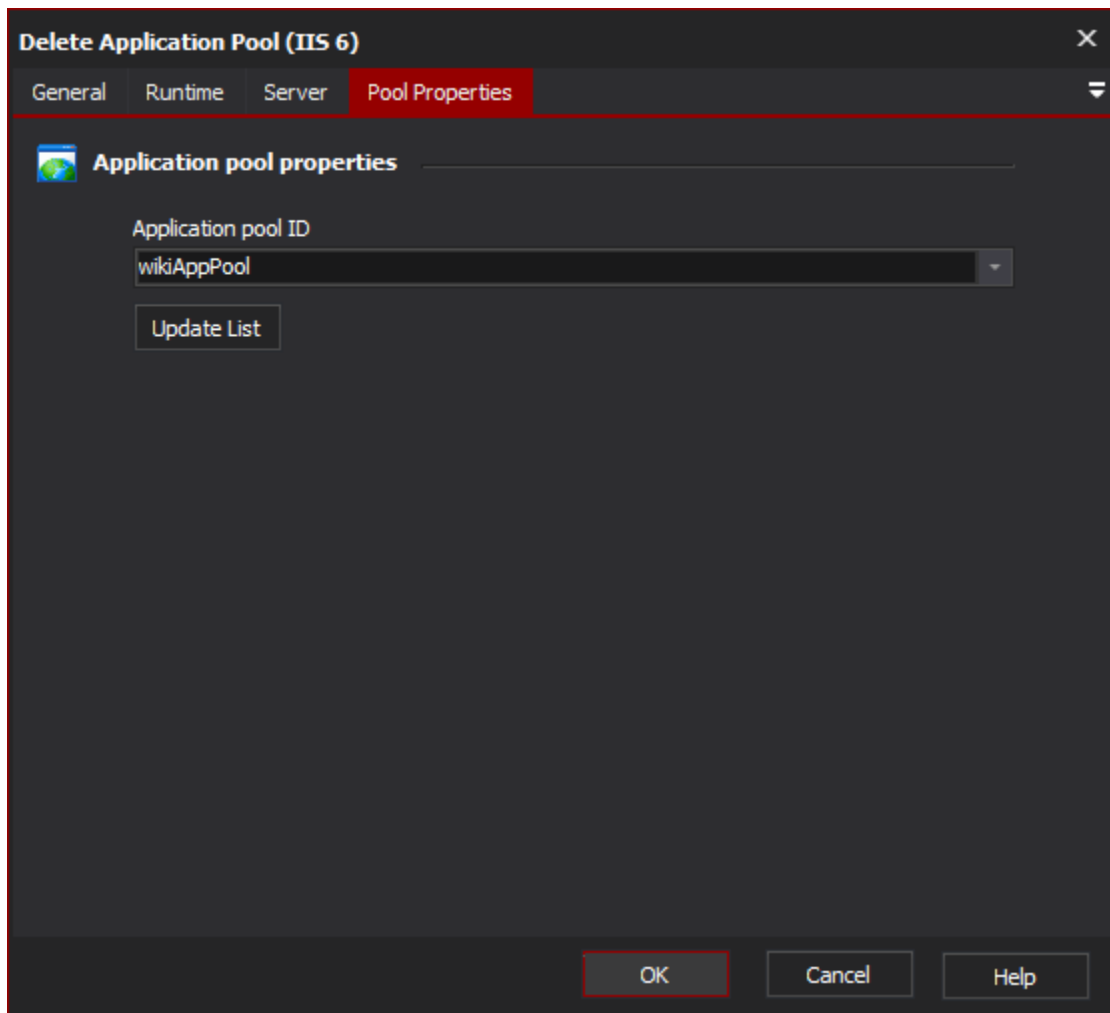

Application pool properties

Application Pool ID

The identifier of the Application Pool to remove. The 'Update List' button will connect with the IIS Server and retrieve all existing Application Pool IDs, adding them to the drop down list.
