

# FTPES Download Files Action

The FTPES Download Files action can be used to download multiple files from the server to the local file system.

## FTPES Download Files

**FTPES Download Files**

General Runtime **FTPES Download Files**

**FTP connection**

DeployFTPES

☐ Reconnect if disconnected

**Download files**

Remote directory  
Logs\

Leave blank for current directory

File spec  
\*.log

☐ Use RegEx to select files

Local directory  
C:\Website\Logs\

**Options**

☐ Create local directory if missing

☐ Ignore individual failures

☐ Overwrite existing files

☐ Fail if zero files downloaded

☐ Detailed FTPES logging

OK Cancel Help

### FTPES Connection

The name of the FTPES connection to be used for the operation.

### Reconnect if disconnected

If the connection has become disconnected, attempt to re-connect and then execute the action.

### Download files

#### Remote Directory

The remote directory that contains the files to be downloaded.

#### File Spec

Specify a file mask to only download files in the remote directory that match the mask.

#### Use RegEx to select files

Enable this option to use a RegEx to select the files to be downloaded (the regular expression is specified via the File Spec field).

## **Local Directory**

This is the local directory that the files will be downloaded to.

## **Options**

### **Create local directory if missing**

If the local directory specified does not exist, create it before attempting to download files.

### **Ignore individual failures**

This option allows a single file to download to fail without affecting the overall outcome of the action.

### **Overwrite existing files**

If a file exists in the destination, overwrite it.

### **Fail if zero files downloaded**

If no files are downloaded, fail the action.

### **Detailed FTPS logging**

Enable this option to log the messages that are sent between the client and the server. This may be useful when attempting to troubleshoot problems.
