FTPS NO-OP Action
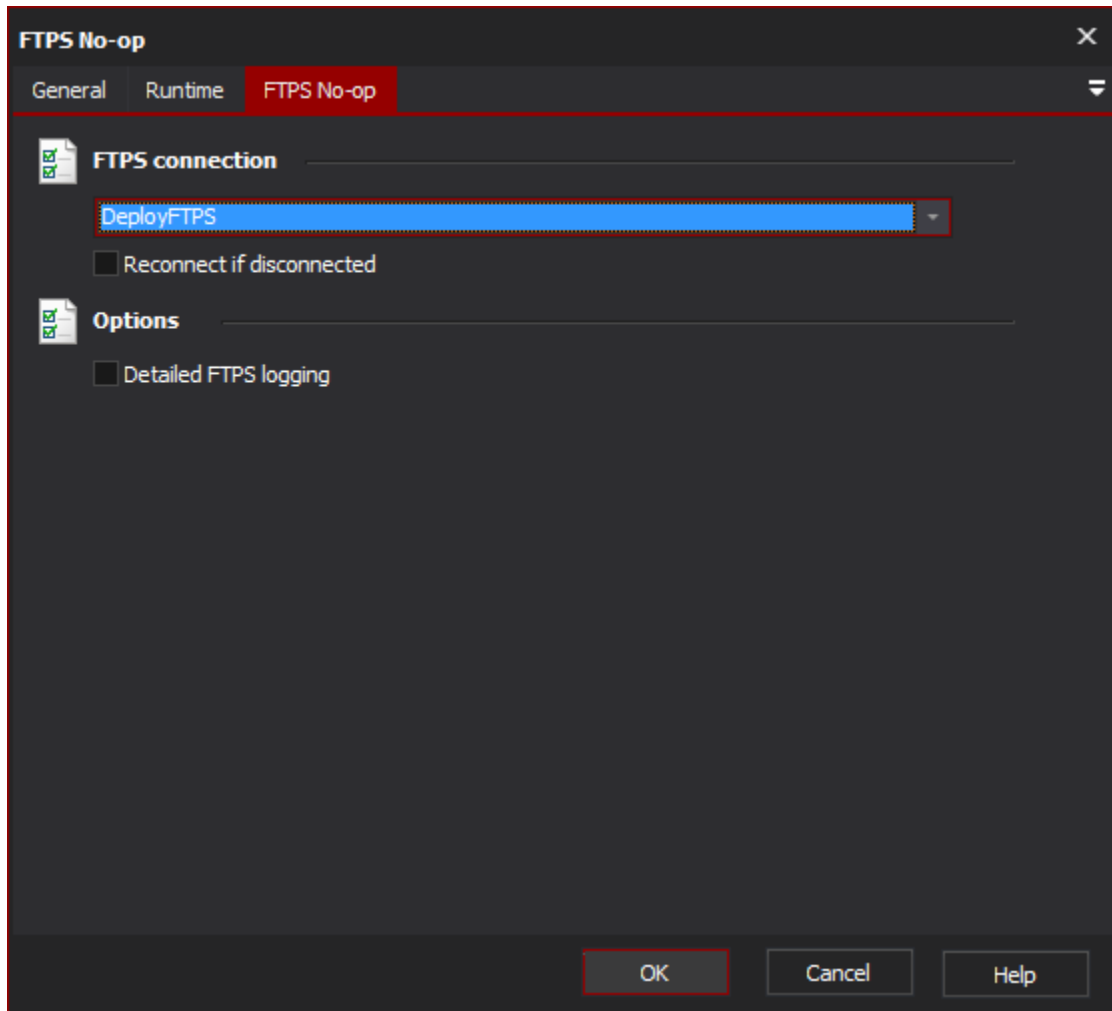

The FTPS NO-OP action sends a NOOP command to the FTPS server. This is used to send a dummy packet to keep the connection alive.

FTPS NO-OP

FTPS Connection

The name of the FTPS connection to be used for the operation.

Reconnect if disconnected

If the connection has become disconnected, attempt to re-connect and then execute the action.

Options

Detailed FTPS logging

Enable this option to log the messages that are sent between the client and the server. This may be useful when attempting to troubleshoot problems.
