# FTPS Upload Files Action

The FTPS Upload files action allows you to upload one or more files from the local file system to the FTPS server.

FTPS Upload Files

FTPS Connection

The name of the FTPS connection to be used for the operation.

Reconnect if disconnected

If the connection has become disconnected, attempt to re-connect and then execute the action.

Upload files

Upload Files

Use the upload files option to provide a list of individual files to be uploaded. Each file listed will be uploaded to the current FTPS directory.

Upload FileSet

Use the upload file set option to provide a file set to be uploaded. When uploading a file set the folder structure of the file set will be maintained, using the current FTPS directory as the root directory.

Upload options

Ignore individual failures

Enable this option to allow a single file upload to fail without affecting the overall outcome of the action.

Fail if zero files uploaded

The action will fail if zero files were uploaded.

Detailed FTPS logging

Enable this option to log the messages that are sent between the client and the server. This may be useful when attempting to troubleshoot problems.
