

Project Information

The Project Information window displays properties of your project, such as the location and last build date, and lets you set author details and free text remarks.

The screenshot shows a window titled "Project Information" with a dark background. It contains several fields for project metadata: Project name, Path, Last Run date/status, Created/Last modified dates, Target/Action counts, Successful/Failed/Total runs, Success ratio, and Log file size. At the bottom, there are input fields for "Author" and "Notes", and "OK" and "Cancel" buttons.

Project Information

Project name: **Imported Project.atp5**

Path: **C:\Users\jason\Documents\Automise Projects**

Last Run date: **<not run yet>**

Author:

Notes:

OK Cancel

The Author and Remarks fields can contain any information you like. They are shown by default on the [Welcome Tab](#).

To view the Project Information window:

- Double-click the Project Information node in the Project Tab.
- Select Project Information in the Project menu.

The project information for a project called "project1" is written to a file called "project1.fbpinf" in the same directory. This file must always be writeable.
