INI Files

INI files are a widely used format for storing text data. They have a specific format which must be adhered to.

The format is:

```
[section name]
```

```
name1=value1
```

```
name2=value2
```

```
[another section name]
```

```
name3=value3
```

```
name4=value4
```

All other text is ignored. Values can contain spaces.

> ⚠ The section name must be unique and is required. Each name in a section must be unique, and must contain a = sign followed by a value. The value maybe blank if required.
