

Private Messages

Private Messages are one way in which users can be notified of Continua CI events. Private messages do not require any publisher to be configured - you only need to set up [Subscriptions](#) to receive these notifications.

You will see the number of unread private messages for the current logged-in user in the top right hand corner of the page. Clicking on the number will show a drop down list of the unread private messages' subjects.

Clicking on a specific private message will redirect you to the page for that private message.

Subject:	Build Started: Build 1.0.0.313 of config 'Continua:NewTest' started by Test User
From:	System
Sent:	19/06/2018 12:55:47 PM

Build '1.0.0.313' of configuration 'Continua:NewTest' which was started by Test User has a status of Build Started

 Delete

Alternatively, you can click the "View All" link which takes you to the Private Message page for the logged in user. On this page you can see all the messages, search for a message and delete messages. Unread messages are shown in bold.
