

Hyper V Delete VM Snapshot Action

The Delete VM Snapshot action allows you to delete a system snapshot

Specify the Hyper V Server settings, see [Hyper V Server page](#).

On the Delete Snapshot Page provide the name of the virtual machine that you want to delete the snapshot from.

The screenshot shows a dark-themed dialog box titled "Hyper V Delete Snapshot" with a close button (X) in the top right corner. Below the title bar is a tabbed interface with four tabs: "General", "Runtime", "Hyper V Server", and "Delete Snapshot" (which is currently selected and highlighted in red). The main content area of the dialog is titled "Delete VM snapshot" with a small icon of a document with a red X. Below this title, there is a label "Virtual machine:" followed by a text input field containing the text "Windows8_1_Pro". Below the input field are two radio button options: "Use most recent snapshot" and "Use specific snapshot". The "Use specific snapshot" option is selected. Below these options is another text input field containing the text "%L_File%". At the bottom of the dialog, there are three buttons: "OK", "Cancel", and "Help".

Select from the following two options:

Delete Snapshot

Delete VM snapshot

Virtual machine

Use most recent snapshot

Use specific snapshot
