

# Hyper V Start VM Action

The Start VM action allows you to start a virtual machine that is not currently in the running state.

Specify the Hyper V Server settings, see [Hyper V Server page](#).

On the Start VM page provide the name of the virtual machine to be started.

The screenshot shows a dark-themed dialog box titled "Hyper V Start VM" with a close button (X) in the top right corner. Below the title bar is a tabbed interface with four tabs: "General", "Runtime", "Hyper V Server", and "Start VM". The "Start VM" tab is currently selected and highlighted in red. Inside the dialog, there is a green play button icon followed by the text "Start VM". Below this, the label "Start virtual machine:" is followed by a text input field containing the text "Windows8\_1\_Pro". At the bottom of the dialog, there are three buttons: "OK", "Cancel", and "Help".
