

# COM+ Start Application Action

The COM+ Start Application action allows you to start a shut down or inactive COM+ Application.

**COM+ Start Application**

General Runtime **COM+ Application**

**Host computer** \_\_\_\_\_  
localhost

**COM+ application** \_\_\_\_\_

☒ Name: \_\_\_\_\_

☐ ID: \_\_\_\_\_

**Partition** \_\_\_\_\_

(Windows 2003 only. Can be specified as an ID or a Name. Leave blank for the base partition.)

OK Cancel Help

## Host Computer

The computer you want to shut down the application on. You will need Administrator privileges on this computer. Blank is equivalent to localhost.

## COM+ Application

You can specify the application name by its name or its ID (GUID.)

## Partition

To specify an application on a different COM+ Partition, enter the name or ID (GUID) of the partition. If no partition is specified, the action operates on the base partition.
