

Unmap Network Drive Action

The unmap network drive action deletes a previously mapped network drive.

Unmap Network Drive

General Runtime **Map Network Drive Options**

Unmap network drive

☒ Unmap single drive

☐ Unmap all network drives

Options

☐ Unmap even if there are open files/folders

OK Cancel Help

Unmap Single Drive

Enter the drive name you wish to unmap, or (optionally, as shown in the picture above) a variable name.

Unmap all network drives

This option will attempt to remove all mapped network drives from the system. The action does not distinguish between drives mapped by Automise and drives mapped by other processes.
