

PsGetSID (Security ID Info) Action

PsGetSID allows you to retrieve an SID for a computer, account or domain. You can also retrieve an account, computer or domain name from an SID. See the PsGetSID help topic in the PsTools help file for more details.

PsGetSID (Security ID Info)

General Runtime Remote **Get SID**

Behaviour

☐ Get SID for computer

☒ Get the SID for an account or the account/computer/domain for an SID:

Domain\UserName

☐ Save result to variable: [dropdown]

OK Cancel Help

Behaviour

Choose "Get SID for computer" to retrieve the SID for the computer specified on the "Remote" tab.

Choose "Get the SID for..." to retrieve the SID for a specified account, computer or domain (in the above example, the Administrator account) or alternatively enter an SID to retrieve the associated account, computer or domain.

Save Result to Variable

Check this option in order to save the SID (or account/domain/computer name) to a variable.

Remote Tab

See the [PsTools Common Options](#) topic.
