Webhook URL

The URL for a connector to a Teams channel. See below.

Message Format

The template format to use when sending the message. This can be used to select either Text or Message Card format. See Template Formats for further details.

Configuring a Incoming Webhook Connector

You can configure an Incoming Webhook from the channel menu in the Teams client application.

Find the Incoming Webhook connector and click the Configure button. Choose a name. and optionally an image, for your connector and click Create.
