

Shared Resources Collection

The shared resources collection **SharedResources** is used by the **\$Build** object and provides access to the list of Shared Resources acquired by the build. Each individual shared resource can be selected by type (Server/Agent), namespace and name.

Name	Description	Item Type	Usage Example	
N/A	A list of shared resources associated with the current build	Shared Resource	<code>\$Build.SharedResources.Server.Namespace.Name\$</code>	"Mirror1: 1 read lock","Mirror2: 1 read lock","Mirror3: 1 read lock"
