

Changeset Object

A child of the [Repository Object](#) and an item in the [Changesets Collection](#), the changeset object describes the properties under `$Source.RepoName.BuiltChangeset`, `$Source.RepoName.LatestChangeset`, `$Source.RepoName.LatestTriggeringChangeset` and each item under `$Source.RepoName.Changesets`

Name	Description	Type	Usage Example	
<code>Branch</code>	The full branch path of the latest changeset associated with this repository	String	<code>\$Source.RepoName.BuiltChangeset.Branch\$</code>	<code>"/branches/a_test_branch"</code>
<code>Branch Name</code>	The branch name of the latest changeset associated with this repository	String	<code>\$Source.RepoName.BuiltChangeset.BranchName\$</code>	<code>"a_test_branch"</code>
<code>ChangedTagName</code>	The name of any tag which was changed by this changeset	String	<code>\$Source.RepoName.LatestTriggeringChangeset.ChangedTagName\$</code>	<code>"tag3"</code>
<code>Comment</code>	The comment associated with this changeset	String	<code>\$Source.RepoName.BuiltChangeset.Comment\$</code>	<code>"This is a test commit"</code>
<code>CommentHTML</code>	The comment associated with this changeset in HTML with issue connector links	String	<code>\$Source.RepoName.BuiltChangeset.CommentHTML\$</code>	<code>"This is a commit for issue 123"</code>
<code>CommitterFullName</code>	The full name of the Continua CI user who committed this changeset (if one exists based on user repository mappings)	String	<code>\$Source.RepoName.BuiltChangeset.CommitterFullName\$</code>	<code>"Peter Toms"</code>
<code>CommitterUserName</code>	The username of the Continua CI User who committed this changeset (if one exists based on user repository mappings)	String	<code>\$Source.RepoName.BuiltChangeset.CommitterUserName\$</code>	<code>"peter.toms@finalbuilder.com"</code>
<code>Created</code>	The date and time when the changeset was committed or created within the source repository	DateTime	<code>\$Source.RepoName.BuiltChangeset.Created\$</code>	<code>"11/09/2014 1:48:36 AM"</code>
<code>FileCount</code>	The number of file changes associated with this changeset	Integer	<code>\$Source.RepoName.BuiltChangeset.FileCount\$</code>	<code>1</code>
<code>FirstTagName</code>	The name of the first (or earliest) tag associated with this changeset	String	<code>\$Source.RepoName.BuiltChangeset.FirstTagName\$</code>	<code>"tag1"</code>
<code>LatestTagName</code>	The name of the latest tag associated with this changeset	String	<code>\$Source.RepoName.BuiltChangeset.LatestTagName\$</code>	<code>"tag3"</code>
<code>RepositoryChangeId</code>	The repositories changeset identifier (revision or commit hash)	String	<code>\$Source.RepoName.BuiltChangeset.RepositoryChangeId\$</code>	<code>"a9ca2c9f4e1e0061075aa47ccb97201a43b0f66f"</code>
<code>RepositoryUsername</code>	The username of the repository user who committed this changeset	String	<code>\$Source.RepoName.BuiltChangeset.RepositoryUsername\$</code>	<code>"Peter Toms"</code>
<code>TagNames</code>	A collection of tag names associated with this changeset	String Collection	<code>\$Source.RepoName.BuiltChangeset.TagNames\$</code>	<code>"tag1,tag2,tag3"</code>
<code>Tags</code>	A collection of tags associated with this changeset	Changeset Tags Collection	<code>\$Source.RepoName.BuiltChangeset.Tags.First().Name\$</code>	<code>"tag1"</code>
<code>Triggering</code>	True if this changeset has triggered the build	Boolean	<code>\$Source.RepoName.LatestTriggeringChangeset.Triggering\$</code>	<code>True</code>
