

# DUnitX Action

This action expects that DUnitX test executables will output NUnit compatible XML. [DUnitX](#) generates NUnit compatible XML using TUnitXXML NUnitLogger in DUnitX.Loggers.XML.NUnit.pas

## DUnitX

Required Field

Name

DUnitX []

☒ Enabled

Test Executable

\\server\bin\DUnitXTest.exe

Path and filename of the DUnitX executable.

XML Output File

\$Workspace\$\mytestoutput.xml

The location of the test output file. [--xmlfile]

Options File

\$Workspace\$\myoptionsfile.txt

The location of a file containing options (each option separated with a new line). [--options]

Unit Tests File

\$Workspace\$\mytests.txt

The location of a file containing a list of unit tests to be run. [--runlist]

Unit Tests To Run

unittest1, unittest2, unittest3

A list of unit tests to be run (each separated by a comma). [--run]

Help

### Name

A friendly name for this action (will be displayed in the [actions workflow area](#)).

### Enabled

Determines if this action will be run within the relevant stage.

### Test Executable

Enter the path and file name of the executable you want to test.

### XML Output Report

Enter the path and file name of where you want the test output to go. This should be located somewhere in the build workspace.

### Options File

Enter the path and file name of a file containing command line options.

Adds the parameter -opt to the DUnitX command line.

### Unit Tests File

Enter the path and file name of a file containing a list of unit tests to be run.

Adds the parameter -rl to the DUnitX command line.

## Unit Tests To Run

A list of unit tests to be run (each separated by a comma).

Adds the parameter `-r` to the DUnitX command line.

Help

## Environment Variables

Multiple environment variables can be defined - one per line. These are set before the command line is run.

## Log environment variables

If this is ticked, environment variable values are written to the build log.

## Generate system environment variables

Tick this checkbox to set up a list of new environment variables prefixed with 'ContinuaCI.' for all current system expression objects and variables.

## Mask sensitive variable values in system environment variables

This checkbox is visible only if the 'Generate system environment variables' checkbox is ticked.

If this is ticked, the values of any variables marked as sensitive will be masked with \*\*\*\* when setting system environment variables. Clear this to expose the values.
