

Assembly Info Updater Action

AssemblyInfo Updater

This action allows you to update one or more AssemblyInfo source files. Supported languages are C#, VB.NET, F#, J#, C++ and Delphi.NET.

AssemblyInfo Updater Action

AssemblyInfo Updater Options Comments

Required Field

Name AssemblyInfo Updater []

☒ Enabled

AssemblyInfo Files

\$Source.MyRepository\src\AssemblyInfo.cs

One file path per line.

Properties to Update

AssemblyTitle:MyApplication

The name of the property and the new value. e.g. PropertyName:Value

☐ Update only

Do not add new properties.

Save

Cancel

Help

Name

A friendly name for this action (will be displayed in the [actions workflow area](#)).

Enabled

Determines if this action will be run within the relevant stage.

AssemblyInfo Files

Enter the full path and file name to the assembly. Put each assembly file on a new line.

Properties To Update

Enter the property and value in the format **AssemblyTitle:"MyApplication"** or **AssemblyTitle:MyApplication**. Each property and value pair must be entered on a new line. Please enter quotes around values as required by each property - Continua will add any missing quotes when updating an existing property but not when inserting new properties.

All properties specified will be applied to all AssemblyInfo files specified in the AssemblyInfo Files field. You can use [Ant Patterns](#) to specify a list of files.

For a list of properties you can update, see <http://msdn.microsoft.com/en-us/library/4w8c1y2s.aspx>. Remember to strip off the "Attribute" word at the end of the class name.

The most commonly used properties are: **AssemblyCompany**, **AssemblyProduct**, **AssemblyCopyright**, **AssemblyFileVersion**, **AssemblyVersion** (can not contain spaces).

Update Only

Update the properties and don't add new ones.
