Help

Name

A friendly name for this action (will be displayed in the [actions workflow area](#)).

Enabled

Determines if this action will be run within the relevant stage.

Root Directory

The root directory to use when searching for files to delete.

File Names / Patterns

Provide file names/patterns to files you want deleted. Each file/pattern must be specified on a single line and must be relative to the root directory specified in the Root Directory field.

You can exclude files by prefixing the file name or pattern with a dash. e.g `-.ignore`. Exclude patterns always take precedence over include patterns

More information about pattern wild cards can be found on the [Ant Pattern Usage](#) page.

Log each deleted item

If a file is deleted, write it to the [Build Log](#).

Ignore warnings

If this is ticked, any warnings logged will not mark the action with a warning status.
