

# Monthly Trigger

 Before reading this page, it is highly recommended you read the [Time Trigger](#) page.

Monthly trigger will start a build once a month at a specified time.

## Monthly

**New Trigger**

Trigger

Monthly

Variables

Time

4:25:26 PM

When to trigger the build.

Repeat

On day number

Day Number

The day of the month to trigger the build. If a month does not include the date then it will run on the last day of the month. eg. the 31st of Sept will run on the 30th.

Associate Changesets

Latest

Associate only the latest changeset from all repositories, or associate all changesets from all repositories that have been committed since the last successful build.

Help

### Time

The time when a build should be triggered.

### Repeat

Specifies which day of the month will fire a build. This field can be one of the following values:

- On day number: A build will be triggered on a specific **day number**. If this value is selected then the **Day Number** property must also be set.
- On the first: A build will be triggered on the first week of each month on a specific **day**. If this value is selected then the **Day** property must also be set.

- On the second: A build will be triggered on the second week of each month on a specific **day**. If this value is selected then the **Day** property must also be set.
- On the third: A build will be triggered on the third week of each month on a specific **day**. If this value is selected then the **Day** property must also be set.
- On the fourth: A build will be triggered on the fourth week of each month on a specific **day**. If this value is selected then the **Day** property must also be set.
- On the last: A build will be triggered on the last week of each month on a specific **day**. If this value is selected then the **Day** property must also be set.

## Day Number

Repeat

Day Number

The day of the month to trigger the build. If a month does not include the date then it will run on the last day of the month. eg. the 31st of Sept will run on the 30th.

This property can only be set if **Repeat** is set to **On day Number**. This property sets the day of the month that a build should be triggered.

**Note:** If a month does not include a day number then a build will be executed on the last day of the month instead. For example, if your trigger fires a build on the 31st of every month, any months that have 30 days will instead trigger a build on the 30th.

## Day

Repeat

Day

This property specifies the day that a build should be triggered. Note that this property is only available when **Repeat is not set to On day number**.

In the above example, a build will be executed on the first Sunday of every month.

## Associate Changesets
